SECTION 1

CONTEXT
1.1 INTRODUCTION

1.1.1 This protocol has been developed to encompass the elective pathway within a hospital environment. The principles can be applied to primary and community settings, however it is recommended that guidance is developed which recognises the specific needs of the care pathway provided in these settings.

1.1.2 The length of time a patient needs to wait for elective treatment is an important quality issue and is a visible public indicator of the efficiency of the hospital services provided by the Trust. The successful management of patients who wait for outpatient assessments, diagnostic investigations and elective inpatient or day case treatment is the responsibility of a number of key individuals within the organisation. General Practitioners, commissioners, hospital medical staff, managers and clerical staff have an important role in ensuring access for patients in line with maximum waiting time guarantees, managing waiting lists effectively, treating patients and delivering a high quality, efficient and responsive service. Ensuring prompt timely and accurate communications with patients is a core responsibility of the hospital and the wider local health community.

1.1.3 The purpose of this protocol is to define those roles and responsibilities, to document how data should be collected, recorded and reported, and to establish a number of good practice guidelines to assist staff with the effective management of outpatient, diagnostic and inpatient waiting lists. It will be a step-by-step guide to staff, and act as a reference work, for the successful management of patients waiting for hospital treatment.

1.1.4 This protocol will be updated, as a minimum, on an annual basis to ensure that Trusts’ polices and procedures remain up to date, and reflect best practice locally and nationally. Trusts will ensure a flexible approach to getting patients treated, which will deliver a quick response to the changing nature of waiting lists, and their successful management.

1.1.5 This protocol will be available to all staff via Trusts’ Intranet.
1.1.6 The DHSSPSNI has set out a series of challenging targets for Trusts in Northern Ireland in the field of elective treatment management. Trusts will recognise the need to move the treatment agenda forward in the context of its shared responsibility for the delivery of these goals.

1.1.7 There is an imperative to identify capacity constraints that could threaten the delivery of these key access targets and speed up the planning and delivery of extra capacity, where it is needed, to address these constraints. The health community will need to develop a co-ordinated approach to capacity planning taking into account local capacity on a cross Trust basis and independent sector capacity on an on-going partnership basis.

1.1.8 In this context, this protocol has been prepared to provide clarity of purpose within Trusts with a view to merging seamlessly with the policies of other agencies in the wider health community as they emerge.

1.1.9 The intention is that this protocol will be further developed to consider all aspects of access to a range of quality healthcare at a date and time of the patients' choice.

1.1.10 This protocol has been prepared to clarify Trusts’ medium and long-term objectives, set the context in which they will be delivered and establish the parameters within which staff at divisional, specialty and departmental levels will operate.

1.1.11 Delivery of this protocol will require a step change in the way Trusts function. Trusts will need to transform themselves and this can only be achieved through a change in the way its staff approach their work on a day-to-day basis. Through this protocol, Trusts will aspire to work with patients and staff to raise expectations basing them not on where we are but on where we need to be.

1.1.12 For the purposes of this protocol, the term inpatient refers to inpatient and day case elective treatment. The term ‘PAS’ refers to all patient
administration systems, whether in a hospital or community setting, or an electronic or manual system.

1.1.13 All staff involved in the administration of waiting lists will ensure that Trusts’ policies and procedures with respect to data collection and entry are strictly adhered to. This is to ensure the accuracy and reliability of data held on PAS and the waiting times for treatment. All staff involved in the implementation of this protocol, clinical and clerical, will undertake initial training and regular annual updating. Trusts will provide appropriate information to staff so they can make informed decisions when implementing and monitoring this protocol. All staff involved in the administration of waiting lists will be expected to read and sign off this protocol.

1.2 UNDERPINNING PRINCIPLES

1.2.1 Patients will be treated on the basis of their clinical urgency with urgent patients seen and treated first. The definition of clinical urgency will be defined specifically by specialty / procedure / service.

1.2.2 Patients with the same clinical need will be treated in chronological order on grounds of fairness, and to minimise the waiting time for all patients.

1.2.3 Patients who are added to the active waiting list must be clinically and socially ready for admission on the day of the decision to admit, i.e. if there was a bed available tomorrow in which to admit a patient - they are fit, ready, and able to come in.

1.2.4 Trusts should design processes to ensure that inpatient care is the exception for the majority of elective procedures, not the norm. The principle is about moving care to the most appropriate setting, based on clinical judgement. This means moving day case surgery to outpatient care, and outpatient care to primary care or alternative clinical models where appropriate.
1.2.5 Change No 1 within the publication “10 High Impact Changes for Service Improvement and Delivery”\(^1\) focuses on day surgery and the document provides Trusts with tools and resources to help implement this high impact change.

1.2.6 Trusts will introduce booking systems aimed at making hospital appointments more convenient for patients. Booking systems are chronologically based and will move Trusts onto a system of management and monitoring that is chronologically as opposed to statistically based.

1.2.7 As part of a plan for the implementation of booking, Trusts must ensure their elective admission selection system is managed on a chronological basis within clinical priority with immediate effect. The intention is to provide patients with certainty and choice enabling them to access services that are sensitive to their needs.

1.2.8 This will require changes in working practices. It will also require technological change to information systems to enable provision of quality information to support the booking process.

1.2.9 There is a need to balance the flow of patients from primary care through outpatients and on to booking schedules should they need elective admission. It follows that the level of activity in the Service and Budget Agreements and the level of provision of outpatient and inpatient capacity must be linked. If one changes, all should change.

1.2.10 This “bottom up” approach is based on the belief that services need to be built on firm clinical foundations. Trusts need a clinical vision built up specialty by specialty and department by department through debate and agreement between clinicians across the health community as to the best way to meet patient needs locally.

1.2.11 It is essential that patients who are considered vulnerable for whatever reason have their needs identified at the point of referral.

1.2.12 All relevant information must be recorded to ensure that when selecting a vulnerable patient for admission, their needs are identified early and appropriate arrangements made. This information should be recorded in detail in the episodic comment field of PAS relating to the listing. The patient master index comment field should not be used due to confidentiality issues.

1.2.13 Communication with this patient group will recognise their needs and, where appropriate, involve other agencies.

1.2.14 An operational process should be developed by Trusts to ensure that children and vulnerable adults who DNA or CNA their outpatient appointment are followed up by the most appropriate healthcare professional and a clear link to the referring clinician established.

1.2.15 In implementing this protocol the needs of ethnic groups and people with special requirements should be considered at all stages of the patient’s pathway.

1.3 OWNERSHIP

1.3.1 Ownership is key to delivering quality of care. Trusts must ensure that all staff are conversant with the Departmental targets and standards and are comfortable with the local health communities’ approach to their delivery.

1.3.2 These targets and standards must be seen to be core to the delivery of all aspects of care provision by all levels of staff within the Trust.

1.3.3 This is a major change agenda requiring significant commitment and investment at corporate and individual level. An Executive Director will take lead responsibility for ensuring all aspects of this Protocol are adhered to.
1.3.4 Trusts must be committed to training and developing staff and providing the supporting systems to ensure that together we can bring about the improvement in patient care.

1.4 REGIONAL TARGETS

1.4.1 The targets in respect of elective treatments are:

- A maximum waiting time of 13 weeks for inpatient and daycase admissions by March 2009
- A maximum waiting time of 9 weeks for a 1st outpatient appointment by March 2009
- A maximum waiting time of 9 weeks for a diagnostic test by March 2009
- A maximum waiting time of 13 weeks from referral to treatment by an Allied Health Professional (AHP) by March 2009
- By March 2009, sustain the target where 98% of patients diagnosed with cancer should begin treatment within a maximum of 31 days of the diagnosis
- By March 2009, 95% of patients with suspected cancer who have been referred urgently should begin their first definitive treatment within a maximum of 62 days

1.5 DELIVERY OF TARGETS

1.5.1 The waiting time targets are based on the “worst case” i.e. they reflect the minimum standards with which every Trust must comply.

1.5.2 The expectation is that these targets are factored into plans at Trust Board, divisional, specialty and departmental levels as part of the normal business
and strategic planning processes. Divisional, specialty and departmental managers will be expected to have produced implementation plans setting out the key steps they need to take to ensure the delivery of the Trust and Departmental protocol objectives within the area(s) of their responsibility. Trusts will manage implementation through a regular review of “local” divisional, specialty and departmental plans for the implementation of waiting and booking targets.

1.5.3 It is expected that Trusts will develop robust information systems to support the delivery of these targets. Daily management information should be available at both managerial and operational level so that staff responsible for selecting patients are working from up to date and accurate information. Future developments should also look towards a clinic management system which will highlight the inefficiencies within the outpatient setting.

1.6 CAPACITY

1.6.1 It is important for Trusts to understand their baseline capacity, the make-up of the current cohort of patients waiting and the likely changes in demand that will impact on their ability to treat patients and meet the Departmental Targets.

1.6.2 To manage at specialty and departmental level it is anticipated that managers will have, as a minimum, an overview of their core capacity including:

- Number of clinic and theatre sessions
- Session length
- Average procedure / slot time
- Average length of stay

1.6.3 It is expected that similar information will be available at consultant level. For inpatients this is at procedure level, and for outpatients and diagnostics at service level.
1.6.4 This information will enable Trusts to evaluate its waiting/booked lists in terms of theatre sessions (time in hours) and length of stay (time in bed days).

1.6.5 Each specialty should understand its elective bed requirements in terms of both inpatients and daycases, setting challenging daycase and LOS targets and agreeing plans to deliver them. In addition, systems must be developed to ensure assessment can be made of available capacity and flexible working arrangements developed accordingly.

1.6.6 Theatre sessions should be seen as corporate resources and used flexibly to ensure the delivery of waiting list and waiting time targets across consultants within the same specialty and specialties within the same Trust. This ties in with the Real Capacity Paper which also requires commissioners to demonstrate that they have used capacity flexibly across Trusts. The expectation is that divisions and/or specialties will be able to demonstrate that they have optimised the use of existing capacity to maximise the treatment of patients within existing resources.

1.6.7 Trusts will treat patients on an equitable basis across specialties and managers will work together to ensure consistent waiting times for patients of the same clinical priority.

1.6.8 Trusts will set out to resource enough capacity to treat the number and anticipated casemix of patients agreed with commissioners. The Real Capacity Planning exercise will support this process locally.

1.6.9 Divisions/specialties will monitor referrals and additions to lists in terms of their impact on clinic, theatre time, bed requirements and other key resources e.g. ICU facilities, to ensure a balance of patients in the system and a balance between patients and resources.

1.6.10 When the balance in the system is disturbed to the extent that capacity is a constraint, divisional/specialty managers will be expected to produce plans
to expedite solutions and agree these through the accountability review process.

1.6.11 It is important for all services to understand their baseline capacity, the make-up of the cohort of patients waiting to be treated and the likely changes in demand that will impact on their ability to initiate treatment and meet the maximum waiting time guarantees for patients.

1.6.12 Trusts should ensure that robust prospective capacity planning arrangements are in place, with clear escalation procedures to facilitate capacity gaps to be identified and solutions found in a timely manner to support operational booking processes and delivery of the targets.

1.6.13 In summary, the intention is to link capacity to the Service and Budget Agreement i.e. to agree the plan, put in place the resources to achieve the plan, monitor the delivery of the plan and take corrective action in the event of divergence from the plan proactively. The existing arrangements whereby patients are added to waiting lists irrespective of whether Trusts have the capacity to treat them must change.

1.7 **BOOKING PRINCIPLES**

1.7.1 These booking principles have been developed to support all areas across the elective pathway where appointment systems are used.

1.7.2 Offering the patient choice of date and time is essential in agreeing and booking appointments with patients. Trusts should ensure booking systems enable patients to choose and agree hospital appointments that are convenient for them. This takes away the uncertainty of not knowing how long the wait will be as patients are advised of their expected wait. Advanced booking in this way also gives patients notice of the date so that they can make any necessary arrangements, such as child care or work arrangements.
1.7.3 Facilitating reasonable offers to patients should be seen within the context of robust booking systems being in place.

1.7.4 Booking development work within Trusts should be consistent with regional and local targets, which provide a framework for progress towards ensuring successful and consistent booking processes across the health community in Northern Ireland.

1.7.5 All booking processes should be underpinned with the relevant local policies and procedures to provide clarity to operational staff of the day to day requirements and escalation route, for example: management of patients who cancel / DNA their appointment, process for re-booking patients, and monitoring of clinical leave and absence.

1.7.6 Trusts should ensure booking processes are continually reviewed and updated as required to reflect local and regional requirements at an operational level.

1.7.7 The definition of a booked appointment is:

a) The patient is given the choice of when to attend.
b) The patient is advised of the total waiting time during the consultation between themselves and the healthcare provider / practitioner or in correspondence from them.
c) The patient is able to choose and confirm their appointment within the timeframe relevant to the clinical urgency of their appointment
d) The range of dates available to a patient may reduce if they need to be seen quickly, e.g. urgent referrals or within 2 weeks if cancer is suspected.
e) The patient may choose to agree a date outside the range of dates offered or defer their decision until later
1.7.8 Booking Process

1.7.9 There are 3 main patient appointment types to be booked. Booking systems for these appointments should be designed around an agreed patient pathway and accepted clinical practice. They are:

a) New Urgent patients (including suspected cancer)
b) New Routine patients
c) Review patients

1.7.10 Clinic templates should be constructed to ensure that sufficient capacity is carved out to meet the local and maximum waiting time guarantees for new patients, and the clinical requirements of follow-up patients.

1.7.11 Principles for booking Cancer Pathway patients

a) All suspected cancer referrals should be booked in line with the agreed clinical pathway requirement for the patient and a maximum of 14 days from the receipt of referral
b) Dedicated registration functions for red flag and suspected cancer referrals should be in place within centralised HROs
c) Clinical teams must ensure triage is undertaken daily, irrespective of leave, in order to initiate booking patients
d) Patients will be contacted by telephone twice (morning and afternoon)
e) If telephone contact cannot be made, a fixed appointment will be issued to the patient within a maximum of 3 days of receipt of referral
f) Systems should be established to ensure the Patient Tracker / MDT Co-ordinator is notified of the suspected cancer patient referral, to allow them to commence prospective tracking of the patient

1.7.12 Principles for booking Urgent Pathway patients

a) Local agreements should be in place with consultants to determine the timeframe within which urgent patients should be booked, and made explicit to booking teams
b) Referrals will be received, registered within one working day and forwarded to consultants for prioritisation.

c) If clinical priority is not received from consultants within 72 hours, processes should be in place to initiate booking of urgent patients according to the GP’s classification of urgency.

d) Patients will be issued with a letter inviting them to contact the Trust to agree and confirm their appointment in line with the urgent booking process.

e) In exceptional cases, some patients will require to be appointed to the next available slot. A robust process for telephone booking these patients should be developed which should be clearly auditable.

1.7.13 Principles for booking Routine Pathway patients

a) Patients should be booked to ensure appointment within the maximum waiting time guarantees for routine appointments.

b) Referrals will be received, registered within one working day at HRO’s and forwarded to consultants for prioritisation.

c) Patients will receive an acknowledgement from the Trust indicating their expected length of wait and information on the booking process they will follow.

d) Approximately eight weeks prior to appointment, Trusts should calculate prospective slot capacity and immediately implement escalation policy where capacity gaps are identified.

e) Patients should be selected for booking in chronological order from the PTL.

f) Six weeks prior to appointment, patients are issued with a letter inviting them to contact the Trust to agree and confirm their appointment.

1.7.14 Principles for Booking Review Patients

a) Patients who need to be reviewed within 6 weeks will agree their appointment before they leave the clinic.
b) Patients who require a review appointment more than 6 weeks in advance will be added to and managed on a review waiting list
c) Patients will be added to the review waiting list with an indicative date of treatment and selected for booking according to this date
d) Six weeks prior to the indicative date of treatment, patients are issued with a letter inviting them to contact the Trust to agree and confirm their appointment within a clinically agreed window either side of the indicative date of treatment

1.7.15 It is recognised that some groups of patients may require booking processes that have additional steps in the pathway. These should be designed around the principles outlined to ensure choice and certainty as well as reflecting the individual requirements necessary to support their particular patient journey. Examples of this include:

a) midwives contacting patients directly by telephone to arrange their appointment
b) clinical genetics services where family appointments are required
c) mental health or vulnerable children’s services where patients may need additional reminders or more than one professional contacted if patients fail to make an appointment.
SECTION 2

GUIDANCE FOR MANAGEMENT OF ICATS SERVICES
2.1 INTRODUCTION

2.1.1 The administration and management of ICATS referrals and ICATS requests for diagnostics must be consistent, easily understood, patient focused, and responsive to clinical decision-making.

2.1.2 ICATS services are managed in accordance with the Data Definitions and Guidance Document for Monitoring of ICATS Services Sept 2007 (Appendix 1).

2.1.3 The level of functionality available on the Electronic Referral Management System to support the administration of patients in an ICATS setting is developmental. Achievement of the standards outlined will be where functionality permits.

2.1.4 Referrals will be managed through a centralised registration process in the nominated Hospital Registration Offices (HRO’s) within Trusts to receive, register and process all ICATS referrals. The Trust should ensure that a robust process is in place to ensure that referrals received outside the HRO are date stamped, forwarded to the HRO and registered onto ERMS according to the date received by the Trust.

2.1.5 All new patients should be able to book their appointment in line with the guidance outlined in Booking Principles Section 1.7. The expectation is that follow up patients should also be offered an opportunity to choose the date and time of their appointment.

2.2 KEY PRINCIPLES

2.2.1 Where ICATS is in place for a specialty, all referrals should be registered and scanned onto Electronic Referral Management System (ERMS) within 24 hours of receipt.

2.2.2 Each ICATS must have a triage rota to ensure that every referral is triaged and the appropriate next step is confirmed, according to the clinically agreed
rules, within three working days of receipt in any Hospital Registration Office (HRO). Triage rotas must take multi-site working into account. A designated officer in ICATS should oversee the triage arrangements.

2.2.3 The outcome of the triage will be confirmed by letters to the GP and patient within a further two working days of triage (five working days in total from receipt).

2.2.4 ICATS clinical staff will be aware of all exclusions that prevent patients from being assessed or treated within the ICATS setting.

2.2.5 Patients of equal clinical priority will be selected for booking in chronological order in order to meet the maximum waiting time guarantee for patients and local access standards.

2.2.6 All patients deemed appropriate will be offered an ICATS appointment within six weeks from the triage date.

2.2.7 Data collection should be accurate, timely, complete and subject to regular audit and validation.

2.2.8 Staff should be supported by appropriate training programmes.

2.3 CALCULATION OF THE WAITING TIME

2.3.1 The waiting time clock for ICATS starts after the triage decision has been taken that an appointment in ICATS clinic is the appropriate next step.

2.3.2 The ICATS clock stops when the patient attends for first appointment or when the patient has been discharged from ICATS.

2.3.3 Patients who cancel an appointment will have their waiting time clock reset to the date the hospital was informed of the cancellation. Patients who refuse a reasonable offer of an appointment will also have their waiting time clock reset to the date the reasonable offer was refused. To ensure the
verbal booking process is auditable, the Trust should make and cancel an appointment using the date of the second appointment date offered and refused for this transaction.

2.3.4 Patients who fail to attend their appointment without giving prior notice (DNA) will have their waiting time clock reset to the date of the DNA.

2.3.4 No patient should have his or her appointment cancelled. If the ICATS service cancels a patient’s appointment, the patient’s waiting time clock will not be reset and the patient should be offered another appointment, ideally at the time of the cancellation, and which is within six weeks of the original appointment date.

2.4 NEW REFERRALS

2.4.1 All ICATS referrals will be registered and scanned onto ERMS within 24 hours of receipt. All referrals forwarded for ICATS triage must be triaged or assessed to make a clear decision on the next step of a referral within three working days of the referral being logged by the HRO onto ERMS.

2.4.2 Within five working days of the referral being recorded onto ERMS, the GP and patient must be issued with written confirmation of the next stage of the patient’s treatment.

2.4.3 Where there is insufficient information for the professional to make a decision, they have the option to either return the referral to the referrer requesting the necessary information or contact the referrer in the first instance to access the necessary information. If this cannot be gained, the referral should be returned to the referrer requesting the necessary information and a new referral may be initiated.

2.4.4 Those patients identified for outpatients and diagnostic services following triage will be managed in line with the relevant sections of this IEAP.
Flowcharts illustrating the Triage Outcomes Process can be found in Appendix 2.

2.5 BOOKING

2.5.1 All patients requiring an appointment in an ICATS will have the opportunity to agree the date and time of their appointment, in line with the booking principles outlined in Section 1.7.

2.5.2 If a patient requests an appointment beyond the six week ICATS standard the patient will be discharged and told to revisit their GP when they are ready to be seen at the ICATS clinic. This will ensure that all patients waiting for an ICATS appointment are fit and ready to be seen. It is accepted that local discretion may be required where short periods of time are involved, for example, if patients are requesting dates up to a week over their breach date. Trusts should ensure that reasonableness is complied with to facilitate recalculation of the patient’s waiting time and to facilitate booking the patient into the date they requested.

2.5.3 Trusts must ensure that all communication to patients is clear, easily understood and complies with all relevant legislation.

2.6 REASONABLE OFFERS

2.6.1 All patients must be offered reasonable notice. A reasonable offer is defined as an offer of appointment, irrespective of provider, that gives the patient a minimum of three weeks’ notice and two appointments. If a reasonable offer is made to a patient, which is then refused, the waiting time will be recalculated from the date of the second appointment date declined.

2.6.2 If the patient is offered an appointment within a shorter notice period and it is refused, the waiting time cannot be recalculated.
2.6.3 If the patient however accepts an appointment at short notice, but then cancels the appointment, the waiting time can be recalculated from the date the service was notified of the cancellation, as the patient has entered into an agreement with the Trust.

2.6.4 It is essential that Trusts have robust audit procedures in place to demonstrate compliance with the above. The Implementation Procedure on Reasonableness can be found in Appendix 3.

2.7 MANAGEMENT OF PATIENTS WHO CANCELLED OR DID NOT ATTEND (DNA) THEIR APPOINTMENT

2.7.1 If a patient DNAs their first ICATS appointment the following process must be implemented:

- Where a patient has had an opportunity to agree the date and time of their appointment, they will not normally be offered a second appointment. These patients will be referred back to the care of their referring clinician.

- Under exceptional circumstances a clinician may decide that a patient should be offered a second appointment. The second appointment must be booked.

2.7.2 If a patient cancels their outpatient appointment the following process must be implemented:

- The patient will be given a second opportunity to book an appointment, which should be within six weeks of the original appointment date.

- If a second appointment is cancelled, the patient will not normally be offered a third opportunity and will be referred back to their referring clinician.
2.7.3 If a patient has been referred back to their referring clinician and the referrer still wishes a patient to be seen in ICATS, a new referral is required.

2.7.4 The Implementation Procedure for the Management of Patients who DNA or Cancel can be found in Appendix 4.

2.8 MAXIMUM WAITING TIME GUARANTEE

2.8.1 If a patient requests an appointment date that is beyond the maximum waiting time guarantee, the patient will be discharged and advised to revisit their GP when they are ready to be seen. This will ensure that all patients waiting for an appointment are fit and ready to be seen. It is accepted that local discretion may be required where short periods of time are involved, for example, if patients are requesting dates up to a week over their breach date. Trusts should ensure that reasonableness is complied to facilitate re-calculation of the patient’s waiting time, and to facilitate booking the patient into the date they requested.

2.9 COMPLIANCE WITH TRUST LEAVE PROTOCOL

2.9.1 It is essential that leave/absence of ICATS practitioners is organised in line with Trusts’ notification of leave protocol. It is also necessary for Trusts to have robust policies and procedures that minimise the cancellation/reduction of ICATS clinics.

2.9.2 The protocol should require a minimum of six weeks’ notification of intended leave. A designated member of staff should have responsibility for monitoring compliance with the notification of leave protocol, with clear routes for escalation, reporting and audit.
2.10 CLINIC OUTCOME MANAGEMENT

2.10.1 There are a number of locations within Trusts where patients present for their ICATS consultation. This protocol applies to all ICATS locations. It is the responsibility of the ERMS user managing the attendance to maintain data quality.

2.10.2 Changes in the patient's details must be updated on ERMS and the medical records on the date of clinic.

2.10.3 When the assessment has been completed, and where there is a clear decision made on the next step, patient outcomes must be recorded on ERMS.

2.11 REVIEW APPOINTMENTS

2.11.1 All review appointments must be made within the time frame specified by the ICATS practitioner. If a review appointment cannot be given at the specified time due to the unavailability of a clinic appointment slot, a timeframe either side of this date should be agreed with the clinician. Where there are linked interventions, discussions on a suitable review date should be discussed and agreed with the ICATS practitioner.

2.11.2 As previously stated, the Booking Centres will be responsible for partially booking all new appointments. Booking Centres will also book review appointments that are required to be more than 6 weeks in the future. ICATS administration staff will make bookings directly with the patient at the clinic for any further appointments needing to occur within 6 weeks.

2.12 TEMPLATE CHANGES

2.12.1 Templates should reflect the commissioning volumes associated with that service area in the Service and Budget Agreement.
2.12.2 Templates will identify the number of slots available for new and follow up appointments; specify the time each clinic is scheduled to start and finish; and identify the length of time allocated to each appointment slot.

2.12.3 All requests for template and temporary clinic rule changes will only be accepted in writing. A minimum of six weeks notice will be provided for clinic template changes.

2.12.4 All requests for permanent and temporary template changes should be discussed with the appropriate service or general manager. The Implementation Procedure for management of Clinic Template Changes can be found in Appendix 5.

2.13 VALIDATION

2.13.1 A continuous process of data quality validation should be in place to ensure data accuracy at all times. Trusts should ensure that all relevant data fields are completed in ERMS. This should be undertaken as a minimum on a monthly basis and ideally on a weekly basis as waiting times reduce.

2.13.2 The data validation process will apply to both new and follow up appointments. The Implementation Procedure for data validation can be found in Appendix 6.
SECTION 3

GUIDANCE FOR MANAGEMENT OF OUTPATIENT SERVICES
3.1 INTRODUCTION

3.1.1 The following protocol is based on nationally recommended good practice guidelines to assist staff with the effective management of outpatient services.

3.1.2 The administration and management of the outpatient pathway from receipt of referral to appointment within and across Trusts must be consistent, easily understood, patient focused, and responsive to clinical decision-making.

3.1.3 There will be dedicated Hospital Registration Offices (HROs) within Trusts to receive, register and process all outpatient referrals. The HROs will be required to register and scan referrals (where appropriate) onto the Electronic Referrals Management System (ERMS) and PAS.

3.1.4 There will be dedicated booking functions within Trusts and all new and review outpatients should have the opportunity to book their appointment. The booking process for non-routine groups of outpatients or those with additional service needs should be designed to identify and incorporate the specific pathway requirements of these patients.

3.2 CALCULATION OF THE WAITING TIME

3.2.1 The starting point for the waiting time of an outpatient new referral is the date the clinician's referral letter is received by Trusts. All referral letters, including faxed, emailed and electronically delivered referrals, will be date stamped on the date received into the organisation.

3.2.2 In cases where referrals bypass the dedicated HRO's, (e.g. sent directly to a consultant), the Trust must have a process in place to ensure that these are date stamped on receipt, immediately forwarded to the HRO and registered at the date on the date stamp.

3.2.2 Patients who cancel an appointment will have their waiting time clock reset to the date the hospital was informed of the cancellation. Patients who
refuse a reasonable offer of an appointment will also have their waiting time clock reset to the date the reasonable offer was refused. To ensure the verbal booking process is auditable, the Trust should make and cancel an appointment using the date of the second appointment date offered and refused for this transaction.

3.2.3 Patients who fail to attend their appointment without giving prior notice (DNA) will have their waiting time clock reset to the date of the DNA.

3.3 **KEY PRINCIPLES**

3.3.1 Referrals into Trusts should be pooled where possible within specialties. Referrals to a specific consultant by a GP should only be accepted where there are specific clinical requirements or stated patient preference. As a minimum, all un-named referrals should be pooled.

3.3.2 All referrals, appointments and waiting lists should be managed according to clinical priorities. Priorities must be identified for each patient on the waiting list, allocated according to urgency of the treatment. Trusts will manage patients in 2 streams, i.e. urgent and routine. Templates should be constructed to ensure enough capacity is available to treat each stream within agreed maximum waiting time guarantees. The Implementation Procedure for Template Redesign can be found in Appendix 7.

3.3.3 The regional target for a maximum OP waiting time is outlined in Section 1.4. Maximum waiting times for urgent patients should be agreed locally with clinicians.

3.3.4 Maximum waiting times for urgent patients should be agreed locally with clinicians, and made explicit to staff booking these patients to ensure that they are appointed within the clinical timeframe indicated by the consultant and capacity issues quickly identified and escalated.
3.3.5 Patients of equal clinical priority will be selected for booking in strict chronological order. Trusts must ensure that Department waiting and booking targets and standards are met.

3.3.6 Data collection should be accurate, timely, complete and subject to regular audit and validation.

3.3.7 Trusts should provide training programmes for staff which include all aspects of this IEAP and its Implementation Procedures. It is expected that training will be cascaded at and by each clinical, managerial or administrative tier within Trusts, providing the opportunity where required, for staff to work through operational scenarios.

3.3.8 Trusts will work towards providing a single point of contact for all patients with respect to outpatient appointment services. It is recognised that there may be services which require alternative processes.

3.4 NEW REFERRALS

3.4.1 All outpatient referrals sent to Trusts will be received at the dedicated HRO’s and registered within one working day of receipt. GP priority status must be recorded at registration.

3.4.2 Trusts will work towards a system whereby the location of all letters can be tracked at all times through the referral and appointment system, and that letters sent to be prioritised and which are not returned can be identified.

3.4.3 All referrals must be prioritised and clinical urgency must be clearly identified. Clinicians will be responsible for ensuring that cover is provided for referrals to be read and prioritised during their absence. A designated officer should oversee this and a protocol will be required for each department.

3.4.5 All outpatient referrals letters will be prioritised and returned to the HRO within 3 working days. It will be the responsibility of the health records
3.4.6 Where clinics take place, or referrals can be reviewed less frequently than weekly, a process must be put in place and agreed with clinicians whereby GP prioritisation is accepted in order to proceed with booking urgent patients.

3.4.7 Inappropriate and inadequate referrals should be returned to the referral source. A minimum referral criteria dataset has been agreed and is outlined in Appendix 8.

3.4.8 An Effective Use of Resources Policy is in place for some services and Trusts should ensure that this is adhered to. The policy is included for reference in Appendix 9.

3.5 URGENT AND ROUTINE APPOINTMENTS

3.5.1 All consultant led outpatient appointments where the patient attends the Trust should be booked. The key requirements are that the patient is directly involved in negotiating the appointment date and time, and that no appointment is made more than six weeks into the future.

3.5.2 All routine patients must be booked within the maximum waiting time guarantee. Urgent patients must be booked within the maximum wait agreed locally with clinicians, from the date of receipt. It is recognised that there will be occasional exceptions to this, where clinical urgency dictates that the patient is appointed immediately. Trusts should ensure that when accommodating these patients, the appointment process is robust and clinical governance requirements met.

3.5.3 Acknowledgment letters will be sent to routine patients within five days of receipt of the referral. The estimated length of wait, along with information on
how the patient will be booked, should be included on the acknowledgement letter.

3.5.4 A minimum of three weeks’ notice should be provided for all routine patients. This does not prevent patients being offered earlier appointment dates. Patients refusing short notice appointments (i.e. less than three weeks’ notice) will not have their waiting time reset, in line with guidance on reasonable offers.

3.5.5 Trusts must ensure that all communication to patients is clear, easily understood and complies with all relevant legislation.

3.6 BOOKING

3.6.1 All new and review consultant led outpatient clinics should be able to book their appointment. This will entail patients having an opportunity to contact the hospital and agree a convenient date and time for their appointment. The use of the Patient Choice field on PAS is mandatory. The only fields that should be used are ‘Y’ to indicate that the appointment has been booked or ‘N’ to indicate that an appointment has not been booked. No other available field should be used as compliance with booking requirements will be monitored via the use of the Patient Choice field. For non-ISOFT and manual administration systems, Trusts should ensure that they are able to record and report patients who have been booked.

3.7 REASONABLE OFFERS

3.7.1 For patients who have been able to book their appointment, a reasonable offer is defined as an offer of appointment, irrespective of provider, that gives the patient a minimum of three weeks’ notice and two appointments. If a reasonable offer is made to a patient, which is then refused, the waiting time will be recalculated from the date the reasonable offer was refused.

3.7.2 If the patient is offered an appointment within a shorter notice period and it is refused, the waiting time cannot be recalculated.
3.7.3 If the patient however accepts an appointment at short notice, but then cancels the appointment, the waiting time can be recalculated from the date of the cancellation as the patient has entered into an agreement with the Trust.

3.7.4 It is essential that Trusts have robust audit procedures in place to demonstrate compliance with the above. The Implementation Procedure on Reasonableness can be found in Appendix 3.

3.8 MANAGEMENT OF PATIENTS WHO CANCELLED (CNA) OR DID NOT ATTEND (DNA) THEIR APPOINTMENT

3.8.1 If a patient DNAs their outpatient appointment, the following process must be implemented.

- Where a patient has had an opportunity to agree the date and time of their appointment, they will not normally be offered a second appointment. These patients will be referred back to the care of their referring clinician.

- Under exceptional circumstances a clinician may decide that a patient should be offered a second appointment. The second appointment must be booked.

3.8.2 There may be instances for review patients where the clinician may wish to review notes prior to any action to remove a patient because of DNA or failure to respond to partial booking invitation letters. Trusts should ensure that robust and locally agreed rules and processes are in place so that booking clerks are clear about how to administer these patients.

3.8.3 In a transition period where fixed appointments are still being issued, patients should have two opportunities to attend.
3.8.4 If a patient cancels their outpatient appointment the following process must be implemented:

- The patient will be given a second opportunity to book an appointment, which should be within six weeks of the original appointment date.
- If a second appointment is cancelled, the patient will not normally be offered a third opportunity and will be referred back to their referring clinician.

3.8.5 Following discharge, patients will be added to the waiting list at the written request of the referring GP and within a four week period from the date of discharge. Patients should be added to the waiting list at the date the written request is received.

3.8.6 The Implementation Procedure on DNAs and Cancellations can be found in Appendix 4.

3.9 MAXIMUM WAITING TIME GUARANTEE

3.9.1 If a patient requests an appointment date that is beyond the maximum waiting time guarantee, the patient will be discharged and advised to revisit their GP when they are ready to be seen in the Outpatient Clinic. This will ensure that all patients waiting for an outpatient appointment are fit and ready to be seen. It is accepted that local discretion may be required where short periods of time are involved, for example, if patients are requesting dates up to a week over their breach date. Trusts should ensure that reasonableness is complied to facilitate re-calculation of the patient’s waiting time, and to facilitate booking the patient into the date they requested.

3.10 COMPLIANCE WITH LEAVE PROTOCOL

3.10.1 Capacity lost due to cancelled or reduced clinics at short notice has negative consequences for patients and on the Trust’s ability to successfully
implement booking processes. Clinic cancellation and rebooking of appointments is an extremely inefficient way to use such valuable resources.

3.10.2 It is essential that planned medical and other clinical leave or absence is organised in line with an agreed Trust Human Resources (HR) protocol. Thus it is necessary for Trusts to have robust local HR policies and procedures in place that minimise the cancellation/reduction of outpatient clinics and the work associated with the rebooking of appointments. There should be clear medical and clinical agreement and commitment to this HR policy. Where cancelling and rebooking is unavoidable the procedures used must be equitable, efficient, comply with clinical governance principles and ensure that maximum waiting times for patients are not compromised.

3.10.3 The protocol should require a minimum of six weeks’ notification of intended leave, in line with locally agreed HR policies.

3.10.4 A designated member of staff should have responsibility for monitoring compliance with the notification of leave protocol, with clear routes for escalation, reporting and audit. The Implementation Procedure for Compliance with Leave Protocol can be found in Appendix 10.

3.11 CLINIC OUTCOME MANAGEMENT

3.11.1 There are a number of locations within Trusts where patients present for their outpatient consultation. This protocol applies to all outpatient areas. It is the responsibility of the PAS user managing the attendance to maintain data quality.

3.11.2 All patients will have their attendance registered on PAS upon arrival in the clinic. The patient must verify their demographic details on every visit. The verified information must be cross-checked on PAS and the medical records.

3.11.3 Changes in the patient's details must be updated on PAS and the medical records on the date of clinic.
3.11.4 When the consultation has been completed, and where there is a clear
decision made on the next step, patient outcomes must be recorded on the
date of clinic. The implementation procedure for the Management of Clinic
Outcomes can be found in Appendix 11.

3.12 REVIEW APPOINTMENTS

3.12.1 All review appointments must be made within the time frame specified by the
clinician. If a review appointment cannot be given at the specified time due
to the unavailability of a clinic appointment slot, a timeframe either side of
this date should be agreed with the clinician. Where there are linked
interventions, discussions on a suitable review date should be discussed and
agreed with the consultant. Trusts should actively monitor patients on the
review list to ensure that they do not go past their indicative month of
treatment and take the necessary action to ensure capacity is available for
this cohort.

3.12.2 Review patients who require an appointment within six weeks will negotiate
the date and time of the appointment before leaving the department and
PAS updated. Patients requiring an appointment outside six weeks will be
placed on a review waiting list, with the indicative appointment date
recorded, and be booked in line with implementation guidance for review
pathway patients.

3.13 CLINIC TEMPLATE CHANGES

3.13.1 Clinic templates should be agreed between the consultant and service
manager. These should reflect the commissioning volumes associated with
that service area in the Service and Budget Agreement and ensure that
there is sufficient capacity allocated to enable each appointment type to be
booked in line with clinical requirements and maximum waiting time
guarantees for patients.
3.13.2 Templates will identify the number of slots available for new urgent, new routine and follow up appointments; specify the time each clinic is scheduled to start and finish; and identify the length of time allocated for each appointment slot.

3.13.3 All requests for template and temporary clinic rule changes will only be accepted in writing. A minimum of six weeks notice will be provided for clinic template changes.

3.13.4 All requests for permanent and temporary template changes should be discussed with the appropriate service or general manager. The Implementation Procedure for the management of Clinic Template Changes can be found in Appendix 5.

3.14 VALIDATION

3.14.1 A continuous process of data quality validation should be in place to ensure data accuracy at all times. This should be undertaken as a minimum on a weekly basis and continually reviewed as waiting times reduce. This is essential to ensure PTLs are accurate and robust at all times. The Implementation Guidance for Data Validation can be found in Appendix 6.

3.14.2 As booking processes are implemented and waiting times reduce, there is no longer the need to validate patients by letter.

3.14.3 For patients in specialties that are not yet booked, they will be contacted to establish whether they will still require their appointment.

3.15 TRANSFERS BETWEEN HOSPITALS or to INDEPENDENT SECTOR

3.15.1 Effective planning on the basis of available capacity should minimise the need to transfer patients between hospitals or to Independent Sector Providers. Transfers should not be a feature of an effective scheduled system.
3.15.2 Transfers to alternative providers must always be with the consent of the patient and the receiving consultant. Administrative speed and good communication are very important to ensure this process runs smoothly. The Implementation Procedure and Technical Guidance for Handling Outpatient Transfers can be found in Appendix 15a.
SECTION 4

PROTOCOL GUIDANCE FOR MANAGEMENT OF DIAGNOSTIC SERVICES
4.1 INTRODUCTION

4.1.1 The following protocol is based on nationally recommended good practice guidelines to assist staff with the effective management of diagnostic waiting lists. Where possible, the principles of good practice outlined in the Outpatient and Elective Admissions Section of this document should be adopted in order to ensure consistent standards and processes for patients as they move along the pathway of investigations, assessment and treatment. This section aims to recognise areas where differences may be encountered due to the nature of specific diagnostic services.

4.1.2 The administration and management of requests for diagnostics, waiting lists and appointments within and across Trust should be consistent, easily understood, patient focused and responsive to clinical decision making.

4.1.3 There will be a centralised registration process within Trusts to receive, register and process all diagnostic referrals. It is expected that this will be in a single location, where possible.

4.1.4 The Trust should work towards introducing choice of the date and time of tests to all patients. The Booking Principles outlined in Section 1 of this document should be considered in the development of this strategy.

4.2 CALCULATION OF THE WAITING TIME

4.2.1 The starting point for the waiting time of a request for a diagnostic test is the date the clinician’s request is received into the department, in line with the guidance on Completing Diagnostic Waiting Times Collection (Definitions Document), September 2007. This can be found in Appendix 14. All referral letters and requests, including faxed, emailed and electronically delivered referrals, will be date stamped on the date received.

4.2.2 Patients who cancel an appointment will have their waiting time clock reset to the date the service was informed of the cancellation.
Patients who refuse a reasonable offer of an appointment will also have their waiting time clock reset to the date the reasonable offer was refused. To ensure the verbal booking process is auditable, the Trust should make and cancel an appointment using the date of the second appointment date offered and refused for this transaction.

Patients who fail to attend their appointment without giving prior notice (DNA) will have their waiting time clock reset to the date of the DNA.

**KEY PRINCIPLES**

Trusts must have in place arrangements for pooling all referrals unless there is specific clinical information which determines that the patient should be seen by a particular consultant with sub-specialty interest.

All diagnostic requests, appointments and waiting lists should be managed according to clinical priority. A clinical priority must be identified for each patient on a waiting list, and patients managed in 2 streams, i.e. urgent and routine. Session or clinic templates should be constructed to ensure enough capacity is available to treat each stream within the maximum waiting time guarantees outlined in Section 1.4. Maximum waiting times for urgent patients should be agreed locally with clinicians.

Data collection should be accurate, timely, complete and subject to regular audit and validation.

Staff should be supported by appropriate training programmes.

Trusts will work towards providing a single point of contact for all patients with respect to diagnostic appointment services. It is recognised that there may be services which require alternative processes.
4.4 NEW DIAGNOSTIC REQUESTS

4.4.1 All diagnostic requests sent to Trusts will be received at a single location within the specialty Department. Trusts should explore the setting of one centralised diagnostic registration centre.

4.4.2 All requests will be registered on PAS / relevant IT system within one working day of receipt. Only authorised staff will have the ability to add, change or remove information in the outpatient module of PAS or other diagnostic system.

4.4.3 Trusts will work towards a system whereby the location of all letters can be tracked at all times through the referral and appointment system and that letters sent for prioritisation and not returned can be identified. Trusts should consider the introduction of clinical tracking systems similar to that used in patient chart tracking.

4.4.4 All requests must be prioritised and clinical urgency must be clearly identified. Clinicians will be responsible for ensuring that cover is provided for requests to be read and prioritised during their absence. A designated officer should oversee this and a protocol will be required for each department.

4.4.5 All requests will be prioritised and returned to the central registration point within 3 working days. It will be the responsibility of the health records manager or departmental manager to monitor this performance indicator. Monitoring on a consultant level will take place by consultant on a monthly basis. Following prioritisation, requests must be actioned on PAS / IT system and appropriate correspondence issued to patients within 1 working day.

4.4.6 Where clinics take place, or requests can be reviewed less frequently than weekly, a process must be put in place and agreed with clinicians whereby the GP’s priority is accepted in order to proceed with booking urgent patients.
4.4.7 Inappropriate and inadequate requests should be returned to the referral source. Minimum referral criteria is being developed to ensure the referral process is robust.

4.5 URGENT AND ROUTINE APPOINTMENTS

4.5.1 All requests must be booked within the maximum waiting time guarantee. The key requirement is that the patient is directly involved in negotiating the date and time of the appointment and that no appointment is made more than six weeks in advance.

4.5.2 Urgent requests must be booked within locally agreed maximum waits from the date of receipt. It is recognised that there will be exceptions to this, where clinical urgency dictates that the patient is appointed immediately. Trusts should ensure that when accommodating these patients, the appointment process is robust and clinical governance requirements met.

4.5.3 All routine patients must be booked within the maximum waiting time guarantee. Acknowledgement letters will be issued to routine patients within 5 working days of receipt of request. The estimated wait, along with information on how the patients will be booked should be included on the acknowledgement letter.

4.5.4 A minimum of three weeks notice should be provided for all routine patients. This does not prevent patients being offered earlier appointment dates. Patients who refuse short notice appointments (i.e. less than three weeks notice) will not have their waiting time reset in line with guidance on reasonable offers.

4.5.5 Trusts must ensure that all communication to patients is clear, easily understood and complies with all relevant legislation.
4.6 CHRONOLOGICAL MANAGEMENT

4.6.1 Patients of equal clinical priority will be selected for appointment in chronological order and Trusts must ensure that regional standards and targets in relation to waiting times and booking requirements are met. The process of selecting patients for diagnostic investigations is a complex activity. It entails balancing the needs and priorities of the patient and the Trust against the available resources.

4.6.2 It is expected that Trusts will use two prioritisation categories; urgent and routine.

4.7 BOOKING METHODS

4.7.1 Booking will enable patients to have an opportunity to contact the service and agree a convenient time for their appointment. As outlined in paragraph 4.1.4, booking strategies should be developed in line with these Booking Principles. In the interim period, while fixed appointments are being issued, Trusts should ensure that the regional guidance is followed in the management of patients.

4.8 REASONABLE OFFERS

4.8.1 For patients who have been able to book their appointment, a reasonable offer is defined as an offer of appointment, irrespective of provider, that gives the patient a minimum of three weeks’ notice and two appointments. If a reasonable offer is made to a patient, which is then refused, the waiting time will be recalculated from the date the reasonable offer was refused. To ensure the verbal booking process is auditable, the Trust should make and cancel an appointment using the date of the second appointment date offered and refused for this transaction.
4.8.2 If the patient is offered an appointment within a shorter notice period and it is refused, the waiting time cannot be recalculated.

4.8.3 If the patient however accepts an appointment at short notice, but then cancels the appointment, the waiting time can be recalculated from the date of the cancellation as the patient has entered into an agreement with the Trust.

4.8.4 It is essential that Trusts have robust audit procedures in place to demonstrate compliance with the above. The Implementation Procedure on Reasonableness can be found in Appendix 3.

4.9 PATIENT CANCELLATIONS (CNAS) AND DID NOT ATTENDEES (DNAS)

4.9.1 If a patient DNAs their diagnostic test, the following process must be implemented.

- Where a patient has had an opportunity to agree the date and time of their appointment, they will not normally be offered a second appointment. These patients will be referred back to the care of their referring clinician.
- Under exceptional circumstances a clinician may decide that a patient should be offered a second appointment. The second appointment must be booked.

4.9.2 There may be instances for follow-up patients where the clinician may wish to review notes prior to any action to remove a patient because of DNA or failure to respond to booking invitation letters. Trusts should ensure that robust and locally agreed rules and processes are in place so that booking clerks are clear about how to administer these patients.

4.9.3 In a transition period where fixed appointments are still being issued, patients should have two opportunities to attend.
4.9.4 If a patient cancels their appointment, the following process must be implemented.

- The patient will be given a second opportunity to book an appointment, which should be within six weeks of the original appointment date.
- If a second appointment is cancelled, the patient will not normally be offered a third opportunity and will be referred back to their referring clinician.

4.9.5 Following discharge, patients will be added to the waiting list at the written request of the referring GP and within a four week period from the date of discharge. Patients should be added to the waiting list at the date the written request is received.

4.10 TRANSFERS BETWEEN HOSPITALS

4.10.1 Effective planning on the basis of available capacity should minimise the need to transfer patients between hospitals. Transfers should not be a feature of an effective scheduled system.

4.10.2 Transfers to alternative providers must always be with the consent of the patient and the receiving consultant. Administrative speed and good communication are very important to ensure this process runs smoothly.

4.11 COMPLIANCE WITH TRUST LEAVE PROTOCOL

4.11.1 One of the major issues regarding the operation of healthcare services is the capacity lost due to cancelled or reduced clinics at short notice. This has negative consequences for patients and on the ability to successfully implement booking requirements. Clinic or session cancellation and rebooking of appointments is an extremely inefficient way to use such valuable resources.
4.11.2 It is therefore essential that leave/absence is organised in line with the Trust’s Human Resources leave protocol. It is necessary for Trusts to have robust policies and procedures that minimise the cancellation/reduction of diagnostic sessions and the work associated with the rebooking of appointments. Where cancelling and rebooking is unavoidable the procedures used must be equitable and comply with clinical governance principles.

4.11.3 The local absence/leave protocol should require a minimum of six weeks’ notification of intended leave, in line with locally agreed policies.

4.11.4 A designated member of staff should have responsibility for monitoring compliance with the notification of leave protocol, with clear routes for escalation, reporting and audit.

4.12 SESSION OUTCOME MANAGEMENT

4.12.1 There are a number of locations within Trusts where patients present for their diagnostic tests. This protocol applies to all diagnostic services. It is the responsibility of the PAS / relevant system user administrating the clinic to maintain data quality.

4.12.2 All patients will have their attendance registered on PAS / IT system upon arrival at the clinic. The patient must verify their demographic details on every visit. The verified information must be cross-checked on PAS / IT system and the medical record.

4.12.3 Changes in the patient’s details must be updated on PAS / IT system and the medical record on the date of clinic.

4.12.4 When the test has been completed, and where there is a clear decision made on the next step, patient outcomes must be recorded on the date of clinic.
4.13.1 **DIAGNOSTIC TEST OUTCOME**

The outcome of the diagnostic test must be available to the referrer without undue delay. A standard for the reporting turnaround time of tests will be introduced during 2008 and Trusts will be expected to monitor and report compliance to the standard.

4.14 **FOLLOW UP APPOINTMENTS**

All follow up appointments must be made within the time frame specified by the clinician. If a follow up appointment cannot be given at the specified time due to the unavailability of a clinic appointment slot, a timeframe either side of this date should be agreed with the clinician. Where there are linked interventions, discussions on a suitable review date should be discussed and agreed with the clinician.

Where follow up appointments are not booked, patients who require a review within six weeks will negotiate the date and time of this appointment before leaving the department and PAS / IT system updated. Patients requiring an appointment outside six weeks will have their appointment managed through a ‘hold and treat’ system. They will be managed on a review waiting list, with an indicative date of treatment and sent a letter confirming their appointment date six weeks in advance.

4.15 **TEMPLATE CHANGES**

Session templates should be agreed with the healthcare professional and service manager. These should reflect the commissioning volumes associated with that service area in the Service and Budget Agreement.

Templates will identify the number of slots available for new urgent, new routine, planned and follow up appointments; specify the time each session is scheduled to start and finish; and identify the length of time allocated for each appointment slot.
4.15.3 All requests for template and temporary session rule changes will only be accepted in writing. A minimum of six weeks notice will be provided for session template changes.

4.15.4 All requests for permanent and temporary template changes should be discussed with the appropriate service or general manager.

4.16 VALIDATION

4.16.1 A continuous process of data quality validation should be in place to ensure data accuracy at all times. This should be undertaken as a minimum on a monthly basis and ideally on a weekly basis as waiting times reduce. This is essential to ensure PTLs are accurate and robust at all times.

4.16.2 As booking processes are implemented and waiting times reduce, there is no longer the need to validate patients by letter.

4.16.3 For patients in specialties which still issue fixed appointments, they will be contacted to establish whether they require their appointment.

4.16.4 Until follow-up and planned appointments are booked, the validation process will apply to follow up appointments.

4.17 PLANNED PATIENTS AND DIAGNOSTICS TESTS CLASSIFIED AS DAY CASES

4.17.1 Trusts should ensure that the relevant standards in the Elective Admissions section of this document are adhered to.
4.18 **PLANNED PATIENTS**

4.18.1 Planned patients are those who are waiting to be recalled to hospital for a further stage in their course of treatment or investigation within specific timescales. This is usually part of a planned sequence of clinical care determined on clinical criteria.

4.18.2 These patients are not actively waiting for treatment to be initiated, only for planned continuation of treatment. A patient’s care is considered as planned if there are clinical reasons that determine the patient must wait set periods of time between interventions. They will not be classified as being on a waiting list for statistical purposes.

4.18.3 Trusts should be able to demonstrate consistency in the way planned patients are treated and that patients are being treated in line with the clinical constraints. Planned patients must have a clearly identified month of treatment in which it can be shown that the patients are actually being treated.

4.19 **HOSPITAL INITIATED CANCELLATIONS**

4.19.1 No patent should have his or her admission cancelled. If Trusts cancel a patient’s admission, the waiting time clock will not be re-set and the patient will be offered an alternative reasonable date at the earliest opportunity, which should must be within the maximum waiting time guarantee.

4.19.2 Trusts should aim to have processes in place to have the new proposed admission date arranged before that patient is informed of the cancellation.

4.19.3 The patient should be informed in writing of the reason for the cancellation and the date of the new admission. The correspondence should include an explanation and an apology on behalf of the Trust.

4.19.4 Trusts will make best efforts to ensure that a patient’s admission is not cancelled a second time for non-clinical reasons.
4.19.5 Where patients are cancelled on the day of a test as a result of not being fit, they will be suspended, pending a clinical review of their condition. The patient should be fully informed of this process.

4.19.6 Hospital initiated cancellations will be recorded and reported to the relevant department on a monthly basis. Where patients are cancelled on the day of appointment as a result of hospital initiated reasons, i.e. equipment failure, a new appointment should, where possible, be agreed with the patient prior to the patient leaving the department.

4.20 PATIENTS LISTED FOR MORE THAN ONE DIAGNOSTIC TEST

4.20.1 Where more than one diagnostic test is required to assist with clinical decision making, the first test should be added to the waiting list with additional tests noted.

4.20.2 Where different clinicians are working together will perform more than one test at one time the patient should be added to the waiting list of the clinician for the priority test with additional clinicians noted, subject to local protocols.

4.20.3 Where a patient requires more than one test carried out on separate occasions by different (or the same) clinician, the patient should be placed on the active waiting list for the first test and on the planned waiting list for any subsequent tests.

4.20.4 Where a patient is being managed in one Trust but has to attend another for another type of diagnostic test, monitoring arrangements must be in place between the relevant Trusts to ensure that the patient pathway runs smoothly.
SECTION 5

GUIDANCE FOR MANAGEMENT OF ALLIED HEALTH PROFESSIONAL (AHP) SERVICES
5.1 INTRODUCTION

5.1.1 Allied Health Professionals work with all age groups and conditions, and are trained in assessing, diagnosing, treating and rehabilitating people with health and social care needs. They work in a range of settings including hospital, community, education, housing, independent and voluntary sectors. This guidance provides an administrative framework to support the management of patients waiting for AHP services.

5.1.2 Although it is written primarily for services provided in Trusts, it is recognised that there are a number of AHPs who provide services for children with physical and learning disabilities within special schools and with special educational needs within mainstream schools. Operational practices in these settings should be in line with the principles of the IEAP and provide consistency and equity for patients. Trusts should collaborate with colleagues within the Department of Education and the relevant schools to harmonise practices and ensure that children are able to access services equitably and within the maximum waiting time guarantees. A robust monitoring process will be required.

5.1.3 For the purposes of this section of the protocol, the generic term ‘clinic’ will be used to reflect AHP activity undertaken in hospital, community or domiciliary settings as it is recognised that AHPs provide patient care in a variety of care locations.

5.2 KEY PRINCIPLES

5.2.1 Trusts should ensure that there is a systematic approach to modernising AHP services which will help to improve access to services and quality of care for patients. This section should be read within the overall context of both the IEAP and the specific section governing the management of hospital outpatient services.
5.2.2 When looking at the experience of the patient it is important to consider the whole of their journey, with both the care and administrative pathways designed to support the patient’s needs at each stage. The wait to receive outpatient therapy is likely to be one of many they experience in different parts of the system. It is the responsibility of all those involved to ensure that the patient wastes as little time as possible waiting and is seen by the right person as quickly as possible.

5.2.3 Booking will enable patients to have an opportunity to contact the hospital and agree a convenient time for their appointment. As outlined in paragraph 4.1.4, booking strategies should be developed in line with these Booking Principles. In the interim period, while fixed appointments are being issued, Trusts should ensure that the regional guidance is followed in the management of patients.

5.3 CALCULATION OF THE WAITING TIME

5.3.1 The waiting time clock for an AHP referral commences on the date the referral letter is received by the AHP service within the Trust. All referral letters, including faxed, emailed and electronically received referrals, will be date stamped on the date received.

5.3.2 The waiting time clock stops when the first definitive AHP treatment has commenced or when a decision is made that treatment is not required. Further information on definitions and sample patient pathways is contained in the Data Definitions and Guidance Document for AHP Waiting Times and can be found in Appendix 12.

5.3.3 As booking systems are introduced, patients should be made a reasonable offer, where clinically possible. Patients who refuse a reasonable offer of treatment, or fail to attend an AHP appointment, will have their waiting time clock re-set to the date the service was informed of the cancellation (CNAs) or the date the patient failed to attend (DNAs).
5.4 NEW REFERRALS

5.4.1 All AHP referrals will be registered on the relevant information system within 1 working day of receipt.

5.4.2 Trusts should work towards a system whereby all AHP referrals sent to the Trust are received at a dedicated registration function (s). Trusts should ensure that adequate systems are in place to deal with multiple referrals for the same patient regarding the same condition from a number of sources.

5.4.3 All referrals must be triaged or assessed to make a clear decision on the next step of a referral and clinical urgency (urgent or routine) clearly identified and recorded. All referrals will be prioritised and returned to the registration point with 3 working days.

5.4.4 Trusts must ensure that protocols are in place to prevent unnecessary delay from date stamping / logging of referrals to forwarding to the AHP department responsible for referral triage and/or initiation of treatment. It will be the responsibility of the relevant manager to monitor this performance indicator.

5.4.5 A robust system should be in place to ensure that cover is provided for referrals to be read and prioritised during practitioners’ absence. A designated officer should oversee this and a protocol will be required for each service.

5.4.6 Where referrals can be reviewed less frequently than weekly, a process must be put in place and agreed with AHPs whereby the referrer’s prioritisation is accepted in order to proceed with booking patients.

5.4.7 Following prioritisation, referrals must be updated on the relevant information system and appropriate correspondence issued to patients within 1 working day. Where there is insufficient information for the AHP to make a decision, they should contact the originating referrer in the first instance to access the
necessary information. If this cannot be gained, the referral should be returned to the referral source.

5.4.8 Trusts will work towards a system whereby the location of all letters can be tracked at all times through the referral and appointment system, and that letters sent to be prioritised and letters which are not returned can be identified.

5.4.9 If at the referral stage the patient / client is identified as being clinically or socially unfit to receive the necessary service the referral should not be accepted (not added to a waiting list) and returned to the originating referrer with a request that they re-refer the patient / client when they are clinically or socially fit to be treated.

5.5 URGENT AND ROUTINE APPOINTMENTS

5.5.1 All routine patients should be appointed within the maximum waiting time guarantee. Urgent patients must be booked within locally agreed maximum waits from the date of receipt. Local booking process should be based upon the principles outlined in Section 1.7.

5.5.2 For routine waiting list patients, an acknowledgement letter will be sent to patients within 5 working days of receipt of the referral, which should provide information to patients on their anticipated length of wait and details of the booking process.

5.5.3 A minimum of three weeks' notice should be provided for all routine patients. This does not prevent patients being offered an earlier appointment. Patients refusing short notice appointments (i.e. less than three weeks notice) will not have their waiting time clock reset, in line with guidance on reasonable offers.

5.5.4 Trusts must ensure that all communication to patients is clear, easily understood and complies with all relevant legislation.
5.6 CHRONOLOGICAL MANAGEMENT

5.6.1 Patients, within each clinical priority category, should be selected for booking in chronological order, i.e. based on the date the referral was received. Trusts should ensure that local administrative systems have the capability and functionality to effectively operate a referral management and booking system that is chronologically based.

5.7 CAPACITY PLANNING AND ESCALATION

5.7.1 It is important for AHP services to understand their baseline capacity, the make-up of the cohort of patients waiting to be treated and the likely changes in demand that will impact on their ability to initiate treatment and meet the maximum waiting time guarantees for patients.

5.7.2 Trusts should ensure that robust prospective capacity planning arrangements are in place, with clear escalation procedures to facilitate capacity gaps to be identified and solutions found in a timely manner to support operational booking processes and delivery of the targets.

5.8 REASONABLE OFFERS

5.8.1 As booking systems are introduced, patients should be offered reasonable notice, where clinically possible. A reasonable offer is defined as an offer of appointment, irrespective of provider, that gives the patient a minimum of three weeks notice and two appointments. If a reasonable offer is made to a patient, which is then refused, the waiting time will be recalculated from the date the reasonable offer was refused. To ensure a verbal booking process is auditable, the Trust should make and cancel an appointment using the date of the second appointment date offered and refused for this transaction.

5.8.2 If the patient is offered an appointment within a shorter notice period and it is refused, the waiting time cannot be recalculated.
5.8.3 If the patient accepts an appointment at short notice, but then cancels the appointment, the waiting time can be recalculated from the date of cancellation as the patient has entered into an agreement with the Trust.

5.8.3 It is essential that Trusts have robust audit procedures in place to demonstrate compliance with the above.

5.9 **AHP SERVICE INITIATED CANCELLATIONS**

5.9.1 No patient should have his or her appointment cancelled. If Trusts cancel a patient’s appointment, the waiting time clock will not be re-set and the patient will be offered an alternative reasonable appointment date, ideally at the time of cancellation, and no more than 6 weeks in advance. The Trust must ensure that the new appointment date is within the maximum waiting time guarantee.

5.9.2 The patient should be informed of the reason for the cancellation and the date of the new appointment. This should include an explanation and an apology on behalf of the Trust.

5.9.3 Trusts will make best efforts to ensure that a patient’s appointment is not cancelled a second time for non-clinical reasons.

5.9.4 AHP service initiated cancellations will be recorded and reported to the relevant department on a monthly basis. Where patients are cancelled on the day of appointment as a result of AHP service initiated reasons, i.e. equipment failure, staff sickness, a new appointment should, where possible, be agreed with the patient prior to the patient leaving the department.
5.10 MAXIMUM WAITING TIME GUARANTEE

5.10.1 If a patient requests an appointment date that is beyond the maximum waiting time guarantee, the patient will be discharged and advised to revisit their referrer when they are ready to be seen. This will ensure that all patients waiting for an AHP appointment / treatment are fit and ready to be seen.

5.10.2 There will undoubtedly be occasions and instances where local discretion is required and sensitivity should be applied when short periods of time are involved; for example, if patients are requesting dates up to a week over their breach date. Trusts should ensure that reasonableness is complied with to facilitate re-calculation of the patient’s waiting time, and to facilitate booking the patient into the date they requested.

5.11 COMPLIANCE WITH LEAVE PROTOCOL

5.11.1 Capacity lost due to cancelled or reduced clinics or visits at short notice has negative consequences for patients and on the Trust’s ability to successfully implement robust booking processes. Clinic cancellation and rebooking of appointments is an extremely inefficient way to use such valuable resources.

5.11.2 It is therefore essential that AHP practitioners and other clinical planned leave or absence is organised in line with an agreed Trust Human Resources (HR) protocol. Thus it is necessary for Trusts to have robust local HR policies and procedures in place that minimise the cancellation/reduction of AHP clinics and the work associated with rebooking patient appointments. There should be clear practitioner agreement and commitment to this HR policy. Where cancelling and rebooking is unavoidable the procedures used must be equitable, efficient and comply with clinical governance principles.

5.11.3 The protocol should require a minimum of six weeks’ notification of planned leave, in line with locally agreed HR policies.
5.11.4 A designated member of staff should have responsibility for monitoring compliance with the notification of leave protocol, with clear routes for escalation, reporting and audit.

5.12 CLINIC OUTCOME MANAGEMENT

5.12.1 All patients will have their attendance recorded or registered on the relevant information system upon arrival for their appointment. The patient must verify their demographic details on every visit. The verified information must be cross-checked on information system and the patient records. Any changes must be recorded and updated in the patient record on the date of the clinic.

5.12.2 When the assessment/treatment has been completed, and where there is a clear decision made on the next step, patient outcomes must be recorded on the date of clinic.

5.13 REVIEW APPOINTMENTS

5.13.1 All review appointments must be made within the time frame specified by the practitioner. If a review appointment cannot be given at the specified time due to the unavailability of a clinic appointment slot, a timeframe either side of this date should be agreed with the practitioner. Where there are linked interventions, discussions on a suitable review date should be discussed and agreed with the practitioner.

5.13.2 Review patients who require an appointment within six weeks will negotiate the date and time of the appointment before leaving the service and PAS / information system updated. Patients requiring an appointment outside six weeks should be managed on a review waiting list, with the indicative date recorded when appointment is required and booked in line with the booking principles outlined.
5.13.3 If domiciliary review appointment is required within 6 weeks, the appointment date should be agreed with the patient and confirmed in writing by the booking office. Where a domiciliary review appointment is required outside 6 weeks, the patient should be managed on a review waiting list, within the indicative date recorded, and booking in line with the booking principles outlined.

5.14 CLINIC TEMPLATE MANAGEMENT

5.14.1 Clinic templates should be agreed between the practitioner and service manager. These should reflect the commissioning volumes associated with that service area in the Service and Budget Agreement.

5.14.2 Templates will identify the number of slots available for new urgent, new routine and follow up appointments; specify the time each clinic is scheduled to start and finish; and identify the length of time allocated for each appointment slot.

5.14.3 All requests for template and temporary clinic rule changes will only be accepted in writing to the relevant service manager. A minimum of six weeks notice will be provided for clinic template changes.

5.14.4 All requests for permanent and temporary template changes should be discussed with the appropriate service or general manager.

5.15 ROBUSTNESS OF DATA / VALIDATION

5.15.1 A continuous process of data quality validation should be in place to ensure data accuracy at all times. This should be undertaken as a minimum on a weekly basis and continually reviewed as waiting times reduce. This is essential to ensure Primary Targeting Lists are accurate and robust at all times.
5.15.2 As booking processes are implemented and waiting times reduce, there is no longer the need to validate patients by letter.

5.15.3 For patients in AHP services that are not yet booked, they will be contacted to establish whether they will still require their appointment.
SECTION 6  PROTOCOL GUIDANCE FOR MANAGEMENT OF ELECTIVE ADMISSIONS
6.1 INTRODUCTION

6.1.1 The following protocol is based on nationally recommended good practice guidelines to assist staff with the effective management of elective waiting lists.

6.1.2 The administration and management of elective admissions within and across Trusts must be consistent, easily understood, patient focused, and responsive to clinical decision-making.

6.2 COMPUTER SYSTEMS

6.2.1 To ensure consistency and the standardisation of reporting with Commissioners and the Department, all waiting lists are to be maintained in the PAS system.

6.2.2 Details of patients must be entered on to the computer system within two working days of the decision to admit being made. Failure to do this will lead to incorrect assessment of waiting list size when the daily / weekly downloads are taken.

6.2.3 As a minimum 3 digit OPCS codes should be included when adding a patient to a waiting list. Trusts should work towards expanding this to 4 digit codes.

6.3 CALCULATION OF THE WAITING TIME

6.3.1 The starting point for the waiting time of an inpatient is the date the consultant agrees with the patient that a procedure will be pursued as an active treatment or diagnostic intervention, and that the patient is medically fit to undergo such a procedure.

6.3.2 The waiting time for each inpatient on the elective admission list is calculated as the time period between the original decision to admit date and the date
at the end of the applicable period for the waiting list return. If the patient has been suspended at all during this time, the period(s) of suspension will be automatically subtracted from the total waiting time.

6.3.3 Patients who refuse a reasonable offer of treatment, or fail to attend an offer of admission, will have their waiting time reset to the date the hospital was informed of the cancellation (CNAs) or the date the patient failed to attend (DNAs). Any periods of suspension are subtracted from the patients overall waiting time.

6.4 STRUCTURE OF WAITING LISTS

6.4.1 To aid both the clinical and administrative management of the waiting list, lists should be sub-divided into a limited number of smaller lists, differentiating between active waiting lists, planned lists and suspended patients.

6.4.2 Priorities must be identified for each patient on the active waiting list, allocated according to urgency of the treatment. The current priorities are urgent and routine.

6.5 INPATIENT AND DAY CASE ACTIVE WAITING LISTS

6.5.1 Inpatient care should be the exception in the majority of elective procedures. Trusts should move away from initially asking “is this patient suitable for day case treatment?” towards a default position where they ask “what is the justification for admitting this patient?” The Trust’s systems, processes and physical space should be redesigned and organized on this basis.

6.5.2 Patients who are added to the active waiting list must be clinically and socially ready for admission on the day of the decision to admit, i.e. if there was a bed available tomorrow in which to admit a patient they are fit, ready, and able to come in.
6.5.3 All decisions to admit will be recorded on PAS within two working days of the decision to admit being taken.

6.5.4 Robust booking and scheduling systems will be developed to support patients having a say in the date and time of their admission. Further guidance will be provided on this.

6.5.5 Where a decision to admit depends on the outcome of diagnostic investigation, patients should not be added to an elective waiting list until the outcome of this investigation is known. There must be clear processes in place to ensure the result of the investigation is timely and in accordance with the clinical urgency required to admit the patient.

6.5.6 The statements above apply to all decisions to admit, irrespective of the decision route, i.e. direct access patients or decisions to directly list patients without outpatient consultation.

6.6 COMPLIANCE WITH TRUST HR LEAVE PROTOCOL

6.6.1 Trusts should have in place a robust protocol for the notification and management of medical and clinical leave and other absence. This protocol should include a proforma for completion by or on behalf of the consultant with a clear process for notifying the theatre scheduler of leave / absence.

6.6.2 The protocol should require a minimum of six weeks’ notification of intended leave, in line with locally agreed consultant’s contracts.

6.6.3 A designated member of staff should have responsibility for monitoring compliance with the notification of leave protocol, with clear routes for escalation, reporting and audit.
6.7 TO COME IN (TCI) OFFERS OF TREATMENT

6.7.1 The patient should be advised of their expected waiting time during the consultation between themselves and the health care provider/practitioner and confirmed in writing.

6.7.2 Patients should be made reasonable offers to come in on the basis of clinical priority. Within clinical priority groups offers should then be made on the basis of the patient’s chronological wait.

6.7.3 All patients must be offered reasonable notice. A reasonable offer is defined as an offer of admission, irrespective of provider, that gives the patient a minimum of three weeks’ notice and two TCI dates. If a reasonable offer is made to a patient, which is then refused, the waiting time will be recalculated from the date of the refused admission.

6.7.4 If the patient is offered an admission within a shorter notice period and it is refused, the waiting time cannot be recalculated.

6.7.5 If the patient however accepts an admission at short notice, but then cancels the admission, the waiting time can be recalculated from the date of that admission as the patient has entered into an agreement with the Trust.

6.7.6 It is essential that Trusts have robust audit procedures in place to demonstrate compliance with the above.

6.8 SUSPENDED PATIENTS

6.8.1 A period of suspension is defined as:

- A patient suspended from the active waiting list for medical reasons, or unavailable for admission for a specified period because of family commitments, holidays, or other reasons i.e. a patient may be suspended during any periods when they are unavailable for treatment for social or
medical reasons (but not for reasons such as the consultant being unavailable, beds being unavailable etc).

- A maximum period not exceeding 3 months.

6.8.2 At any time a consultant is likely to have a number of patients who are unsuitable for admission for clinical or social reasons. These patients should be suspended from the active waiting list until they are ready for admission. All patients who require a period of suspension will have a personal treatment plan agreed by the consultant with relevant healthcare professionals. One month prior to the end of the suspension period, these plans should be reviewed and actions taken to review patients where required.

6.8.3 Every effort will be made to minimise the number of patients on the suspended waiting list, and the length of time patients are on the suspended waiting list.

6.8.4 Should there be any exceptions to the above, advice should be sought from the lead director or appropriate clinician.

6.8.5 Suspended patients will not count as waiting for statistical purposes. Any periods of suspension will be automatically subtracted from the patient's total time on the waiting list for central statistical returns.

6.8.6 No patient added to a waiting list should be immediately suspended. Patients should be recorded as suspended on the same day as the decision was taken that the patient was unfit or unavailable for surgery.

6.8.7 No patient should be suspended from the waiting list without a review date. All review dates must be 1st of the month to allow sufficient time for the patient to be treated in-month to avoid breaching waiting times targets.

6.8.8 No more than 5% of patients should be suspended from the waiting list at any time. This indicator should be regularly monitored.
6.8.9 Trusts should ensure that due regard is given to the guidance on reasonableness in their management of suspended patients.

6.9 PLANNED PATIENTS

6.9.1 Planned patients are those who are waiting to be recalled to hospital for a further stage in their course of treatment or surgical investigation within specific timescales. This is usually part of a planned sequence of clinical care determined on clinical criteria (e.g. check cystoscopy).

6.9.2 These patients are not actively waiting for treatment, but for planned continuation of treatment. A patient is planned if there are clinical reasons that determine the patient must wait set periods of time between interventions. They will not be classified as being on a waiting list for statistical purposes.

6.9.3 Trusts should be able to demonstrate consistency in the way planned patients are treated and that patients are being treated in line with the clinical constraints. Planned patients should have a clearly identified month of treatment in which it can be shown that the patients are actually being treated.

6.9.4 Ideally, children should be kept under outpatient review and only listed when they reach an age when they are ready for surgery. However, where a child has been added to a list with explicit clinical instructions that they cannot have surgery until they reach the optimum age, this patient can be classed as planned. The Implementation Procedure for Planned Patients can be found in Appendix 13.

6.10 CANCELLATIONS AND DNA’S

6.10.1 Patient Initiated Cancellations
Patients who cancel a reasonable offer will be given a second opportunity to book an admission, which should be within six weeks of the original admission date. If a second admission offer is cancelled, the patient will not normally be offered a third opportunity and will be referred back to their referring clinician.

6.10.2 Patients who DNA

If a patient DNAs their first admission date, the following process must be implemented:

- Where a patient has had an opportunity to agree the date and time of their admission, they will not normally be offered a second admission date.

- Under exceptional circumstances a clinician may decide that a patient should be offered a second admission. The second admission date must be agreed with the patient.

6.10.3 In a period of transition where fixed TCIs are still being issued, patients should have two opportunities to attend.

6.10.4 Following discharge patients will be added to the waiting list at the written request of the referring GP and within a four week period from date of discharge. Patients should be added to the waiting list at the date of the written request is received.

6.10.5 It is acknowledged that there may be exceptional circumstances for those patients identified as being ‘at risk’ (children, vulnerable adults).

6.10.6 No patient should have his or her operation cancelled prior to admission. If Trusts cancel a patient’s admission/operation in advance of the anticipated TCI date, the waiting time clock (based on the original date to admit) will not be reset and the patient will be offered an alternative reasonable guaranteed future date within a maximum of 28 days.
6.10.7 Trusts should aim to have processes in place to have the new proposed admission date arranged before the patient is informed of the cancellation.

6.10.8 The patient should be informed in writing of the reason for the cancellation and the date of the new admission. The correspondence should include an explanation and an apology on behalf of the Trust.

6.10.9 Trusts will make best efforts to ensure that a patient’s operation is not cancelled a second time for non clinical reasons.

6.10.10 Where patients are cancelled on the day of surgery as a result of not being fit for surgery / high anaesthetic risk, they will be suspended, pending a clinical review of their condition either by the consultant in outpatients or by their GP. The patient should be fully informed of this process.

6.10.11 Hospital-initiated cancellations will be recorded and reported to the relevant department on a monthly basis.

6.11 PERSONAL TREATMENT PLAN

6.11.1 A personal treatment plan must be put in place when a confirmed TCI date has been cancelled by the hospital, a patient has been suspended or is simply a potential breach. The plan should:

- Be agreed with the patient
- Be recorded in the patient’s notes
- Be monitored by the appropriate person responsible for ensuring that the treatment plan is delivered.

6.11.2 The listing clinician will be responsible for implementing the personal treatment plan.
6.12 CHRONOLOGICAL MANAGEMENT

6.12.1 The process of selecting patients for admission and subsequent treatment is a complex activity. It entails balancing the needs and priorities of the patient and the Trust against the available resources of theatre time and staffed beds.

6.12.2 The Booking Principles outlined in Section 1.7 should underpin the development of booking systems to ensure a system of management and monitoring that is chronologically as opposed to statistically based.

6.12.3 It is expected that Trusts will work towards reducing the number of prioritisation categories to urgent and routine.

6.13 PRE-OPERATIVE ASSESSMENT

6.13.1 All patients undergoing an elective procedure (including endoscopy procedures) must undergo a pre-operative assessment. This can be provided using a variety of methods including telephone, postal or face to face assessment. Please refer to the Design and Deliver Guide 2007 for further reference.

6.13.2 Pre-operative assessment will include an anaesthetic assessment. It will be the responsibility of the pre-operative assessment team, in accordance with protocols developed by surgeons and anaesthetists, to authorise fitness for surgery.

6.13.3 If a patient is unfit for their operation, their date will be cancelled and decision taken as to the appropriate next action.

6.13.4 Only those patients that are deemed fit for surgery may be offered a firm TCI date.

6.13.5 Pre-operative services should be supported by a robust booking system.
6.14 PATIENTS WHO DNA THEIR PRE OPERATIVE ASSESSMENT

6.14.1 Please refer to the guidance outlined in the Outpatient section.

6.15 VALIDATION OF WAITING LISTS

6.15.1 A continuous process of data quality validation should be in place to ensure data accuracy at all times. This should be undertaken as a minimum on a monthly basis, and ideally on a weekly basis as waiting times reduce. This is essential to ensure the efficiency of the elective pathway at all times.

6.15.2 As booking processes are implemented and waiting times reduce, there will no longer be the need to validate patients by letter. For patients in specialties that are not yet booked, they will be contacted to establish whether they will still require their admission.

6.15.3 Involvement of clinicians in the validation process is essential to ensure that waiting lists are robust from a clinical perspective. Trusts should ensure an ongoing process of clinical validation and audit is in place.

6.16 PATIENTS LISTED FOR MORE THAN ONE PROCEDURE

6.16.1 Where the same clinician is performing more than one procedure at one time, the first procedure should be added to the waiting list with additional procedures noted.

6.16.2 Where different clinicians working together will perform more than one procedure at one time the patient should be added to the waiting list of the clinician for the priority procedure with additional clinician procedures noted.

6.16.3 Where a patient requires more than one procedure performed on separate occasions or bilateral procedures by different (or the same) clinician, the patient should be placed on the active waiting list for the first procedure and the planned waiting list for any subsequent procedures.
6.17 TRANSFERS BETWEEN HOSPITALS or to INDEPENDENT SECTOR

6.17.1 Effective planning on the basis of available capacity should minimise the need to transfer patients between hospitals or to Independent Sector Providers. Transfers should not be a feature of an effective scheduled system.

6.17.2 Transfers to alternative providers must always be with the consent of the patient and the receiving consultant. Administrative speed and good communication are very important to ensure this process runs smoothly. The Implementation Procedure and Technical Guidance for Handling Inpatient Transfers can be found in Appendix 15b.
